PROFESSIONAL SUMMARY

Product Engineer with a B.S. in Computer Science Engineering Technology and hands-on experience designing, building, and shipping full-stack web and mobile applications. Proficient in TypeScript, Java, Python, and Firebase, with a strong product and UX mindset for translating user needs into scalable, production-ready features. Experienced across the full software development lifecycle, including feature design, rapid prototyping, software testing, debugging, and iterative release in Agile environments. Recognized for cross-functional collaboration with design and engineering teams, data-informed decision-making, and delivering intuitive digital products with measurable impact.

Education: University of Toledo, Toledo, Ohio | Bachelor of Science (B.S.) in Computer Science Engineering Technology

Graduation Date: December 2023

CORE COMPETENCIES

Product Engineering | Full-Stack Development | Software Development Lifecycle (SDLC) | Feature Design & Development | TypeScript | JavaScript | Java | Python | SQL | Firebase | REST APIs | Git & GitHub | UI/UX Design | Wireframing & Prototyping | Figma | Agile & Scrum | Software Testing & Debugging | QA Testing (Web & Mobile) | Cross-Functional Collaboration | Product Strategy | User-Centered Design | Data Analysis | AI & Machine Learning Concepts | Technical Documentation

SKILLS AND SOFTWARE

Software / Systems / Applications: Visual Studio Code, IntelliJ IDEA, GitHub, Git, Figma, Canva, Firebase, Google Cloud, Claude Code, TypeScript, JavaScript, Java, Python, SQL, HTML, CSS, iOS, UI/UX Design, Mobile App Design, Responsive Web Design

EMPLOYMENT HISTORY

November 2025 - April 2026

Product Engineer (Contract) | Wait: The Waiting Room

- Designed, developed, and shipped new user-facing features in TypeScript across web and mobile, including a client waitlist, a "Book Soonest Available Barber" quick-action flow, a floating "In a Hurry" button, a dark/light mode toggle, and a daylight savings time handler.
- Integrated Google Firebase to power real-time data syncing, automated email confirmations, and notifications for bookings, cancellations, and reschedules, improving end-to-end communication between clients and barbers.
- Resolved high-impact scheduling defects including double-booking and time-sync issues by debugging concurrent write logic, contributed to UI/UX design decisions, and performed end-to-end QA testing across web and mobile to ensure a reliable production release.

Science Teacher | The Bounty Collegium

November 2024 - June 2025

- Designed and delivered hands-on STEM curriculum for 6th and 7th graders, translating complex technical concepts into interactive, outcome-driven lessons.
- Managed curriculum planning, execution, and progress tracking end-to-end, applying project management and iterative improvement practices used in Agile product environments.
- Leveraged assessment data and performance reports to identify trends and adjust instruction, mirroring how product teams use metrics and user feedback to guide decisions.

Social Media Manager | Vivre Cosmetics

October 2020 - December 2020

- Grew cross-platform social presence (Instagram 13K, TikTok), driving a 25% increase in brand engagement and 2K+ new followers through data-informed content strategy.
- Executed analytics-driven campaigns and reported KPIs to leadership via Excel dashboards, supporting data-driven marketing and resource allocation decisions.
- Partnered cross-functionally with design, marketing, and influencer teams to ship campaigns on schedule and maintain a consistent brand experience.

Public Relations Chair | Muslim Youth of North America (MYNA)

June 2020 - September 2020

- Led communication strategy and marketing assets for national youth conferences reaching 1,000+ participants.
 - Produced print and digital campaign assets in Canva and Adobe tools, maintaining consistent branding across events.
 - Analyzed engagement data to inform marketing decisions and iteratively improve content performance across campaigns.
-

INDEPENDENT AND TEAM PROJECTS

Fullstack Developer | Halal Eats App

January 2023 - Present

- Designed and developed a Halal restaurant discovery app using Figma for UI/UX and Java for backend, focused on intuitive user flow and seamless cross-screen navigation.
- Drove product strategy, feature prioritization, and usability testing to balance user needs with technical feasibility and release velocity.
- Applied Agile sprint cycles and GitHub version control to enable efficient iterative development and cross-team collaboration.

Senior Capstone Project | Network Security Camera Installation

August 2023 - December 2023

- Led modernization of the College of Engineering Technology's surveillance system, integrating Ubiquiti UNVR solutions across a multi-building environment.
- Owned system design, requirements gathering, and installation planning to ensure optimal camera placement, coverage, and network performance.
- Coordinated cross-departmentally to align milestones, manage budgets, and deliver a scalable, cost-efficient network model with improved data accessibility.
